# Signalling devices

Traffic light

# MS25/C-D-1-0-1-1-5R3-5G3 Art. No. 253718

### MY R. STAHL MSA

- · Pre-wired for use with a multi-purpose signalling device
- Corrosion-resistant
  - Suitable for offshore/onshore and harsh environments
- FX15 signalling device made from GRP and YA90 for visual and audible alerts
- including
- flashing xenon or steady LED options
- Sounder with max. output of 115 dB
- Ex e connection chamber
- Quick and easy to terminate
- · High degree of protection IP66 and IP67
- Extreme temperature range from -55 °C to +70 °C
- · Light-enhancing lens, eight colour options
- · Up to five beacon positions, plus junction box
- · Up to three beacon positions and one YA90 sounder plus
- junction box

The MEXE, MS25, MS35, MS45 and MS55 product series represent user-friendly solutions, which are used for status indication purposes in harsh environments or hazardous areas. Whether installing a single beacon or a multi-unit device, the assembly process is performed using certified components, which are pre-connected in an Ex e junction box, making installation quick and easy. The enclosures of the signalling devices are made from GRP and are installed on the stainless steel back plate using corrosion-resistant mounting equipment. The system provides the user with a status indication unit, incorporating either

xenon or LED beacons, along with audible notification, if required. The extreme temperature range and IP degree of protection, along with corrosion-resistant materials, make this device the ideal choice for both onshore and offshore applications.

## **Technical Data**

| Explosion Protection            |                            |
